# Key Add-Ons of netDocShare

## netDocShare Teams app

Access any NetDocuments content including ndThread & NetDocuments Tasks in Microsoft Teams as a personal app, Team Channel Post Tab, 1-1 Private Chat, and Teams Meeting.

### *Key Highlights

- Share NetDocuments content from Channel Tab into the Posts Tab.
- Share NetDocuments content within Team Channel Posts, 1-1 Private Chat & the Teams Meeting.
- Advanced Search capability to search for specific NetDocuments content sources right within the Channel tab.
- Save/Archive Microsoft Teams Channel Post (incl. attachments) Threads to NetDocuments for compliance/governance.
- Easily Synchronize NetDocuments documents or doc links with Teams Files Tab using Quick Sync.

*netDocShare Teams app is the only highly approved third-party app for NetDocuments content in Microsoft Teams.

## netDocShare Sync

Automatically perform bi-directional/one-way sync of everything or selected folders/files, including metadata fields, between Microsoft SharePoint, Microsoft Teams Files, OneDrive for Business, and NetDocuments Workspaces/folder.

## netDocShare Hybrid Search

Search multiple NetDocuments and SharePoint content sources from one single integrated search interface in Microsoft SharePoint.
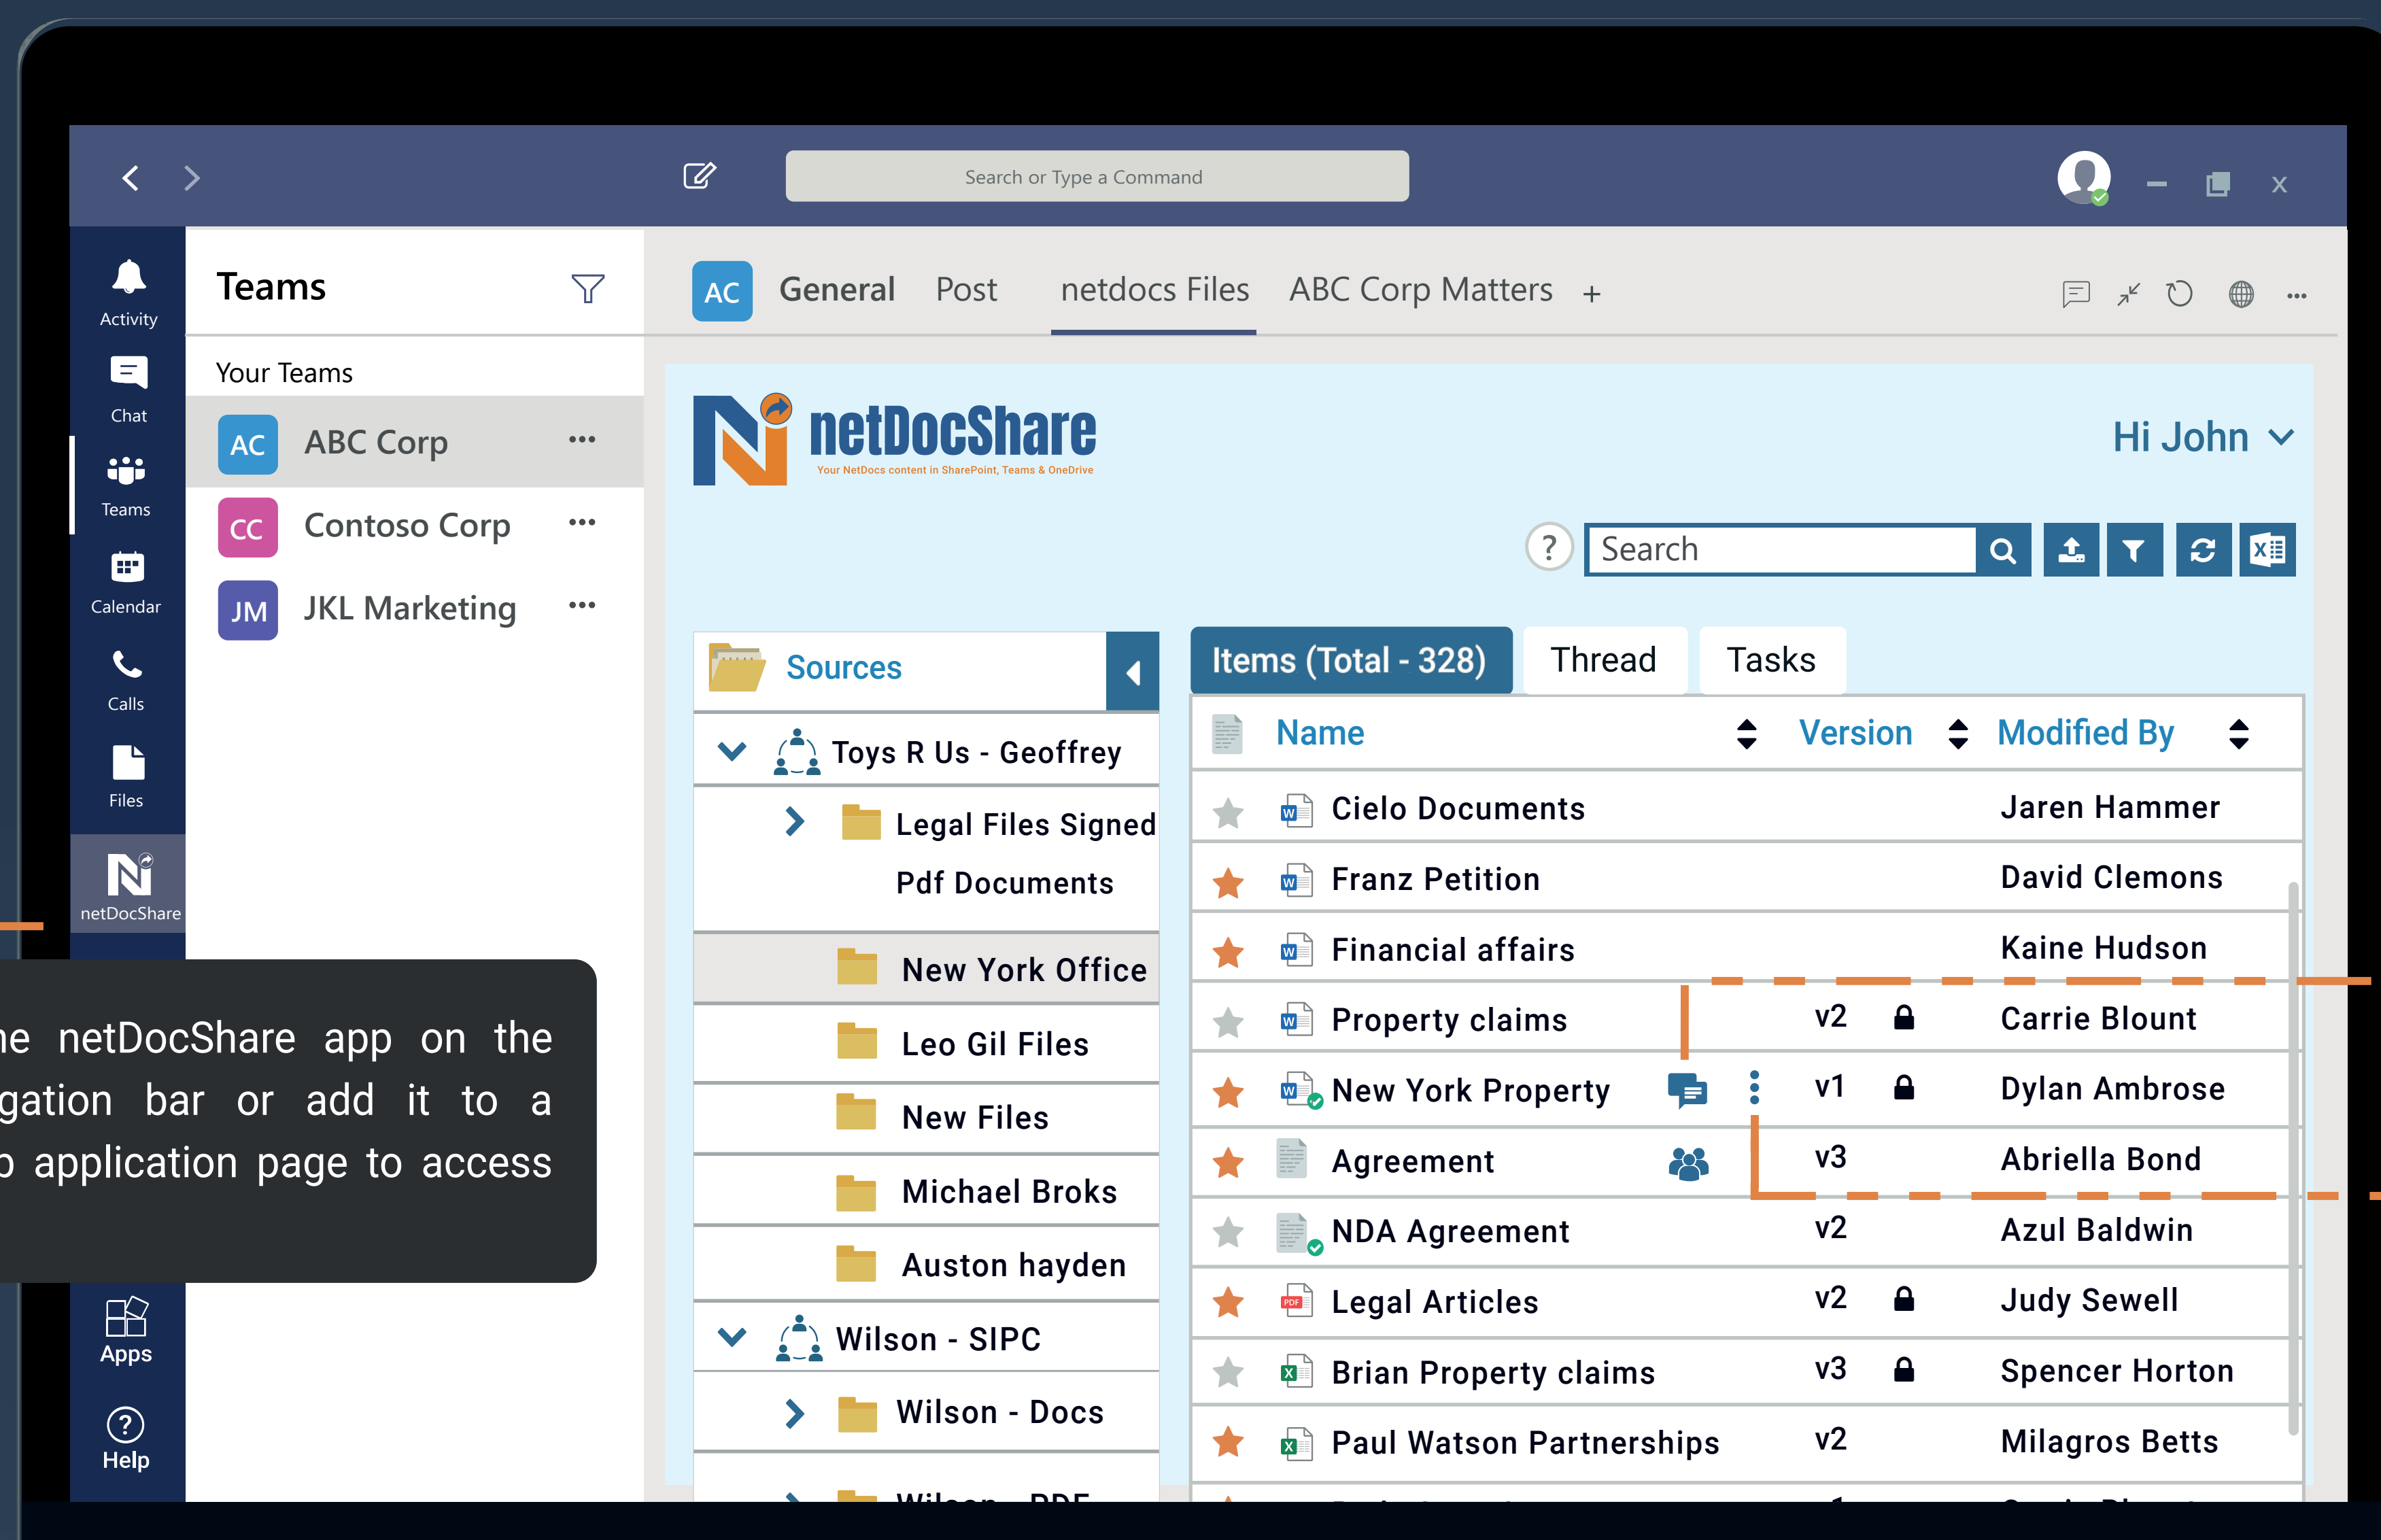

## netDocShare Provisioning

Ability to bulk create/edit/update Microsoft Teams, Channels & Tabs empowered with NetDocuments content using netDocShare Tab & Sync.

## netDocShare Co-Authoring

Co-author Office (version 2013 or above) documents saved in Microsoft SharePoint and Microsoft Teams using Office Client like Word or Excel.

You can simply pin the netDocShare app on the Microsoft Teams Navigation bar or add it to a SharePoint page or Web application page to access NetDocuments content.
